Saturday

Members of EAA Chapter 1099,

My fellow aviators, neighbors, and friends. Thank you **all** so much for sponsoring my trip to the EAA Air Academy. I have been having such a wonderful time learning about all the different aspects of aviation. I have been through many workshops and a lot classroom time that helped me learn more about the different types and parts of airplanes. I learned how to fabricate a wing frame out of wood, an airplug spark box out of sheet metal, as well as so much more!

This has been a wonderful learning opportunity and a great memory that I shall cherish for the rest of my life. It is so nice to see all the aeronautical enthusiasts out there! I highly recommend this program to anyone who has a passion for aviation.

I am looking forward to Air Venture 2011, as it is my first time attending, and the show begins in just two days! I can hardly wait.

I look forward to our next meeting where I can show and tell all of you more about the highlight of my summer.

Sincerely,

Jessica Schue
